

# HUSSL TC4 | TC10 | KT

## **The TC4 is a lightweight, sturdy table. Simple. Versatile.**

The TC4 is suitable for various uses. And it can be easily integrated into a variety of different rooms. Because it is simply built: square or rectangular, light and easy to move. Always in new combinations. In the square version, it even is stackable. Ideally suited for utilitarian use in the contract market. Thanks to solid craftsmanship and durable surfaces.

TC4

Design TC4: Arge 2 | Michael Spindler, Georg Kaserer

Design TC10: Peter Hussli

**The TC10 plays it straight. Frees up space. Stands its ground.**

The solid wood legs of the TC10 are mitred to the tabletop – dowelled and reinforced on the inside. A cover plate on the underside of the tabletop provides increased stability. The veneered surfaces are glued to a laminate panel, which makes them especially robust. In its square version, the TC10 is stackable.

TC10

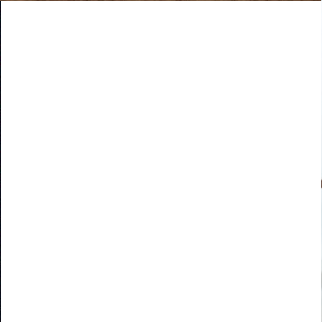

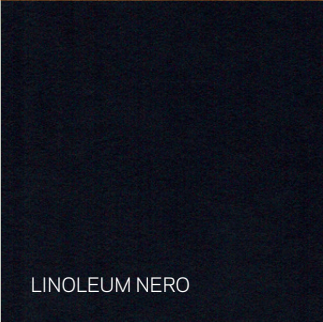

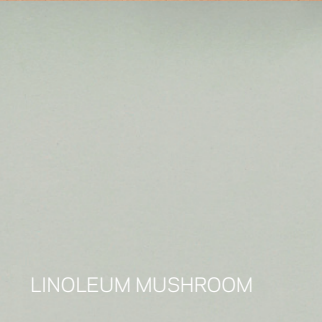

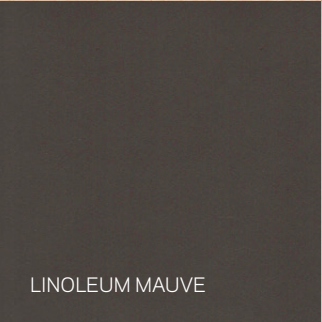

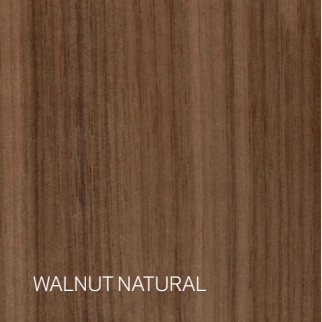

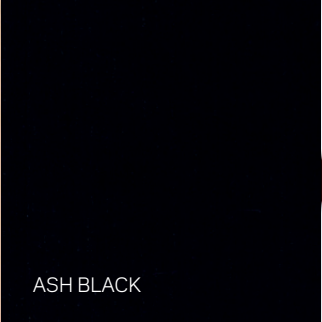

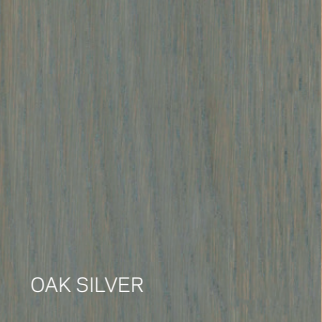

## KT

A folding table which at first glance does not appear to be one. Mitred to the table frame is a U-shaped leg with the folding hinge built in. The legs are supported by a stainless-steel clip when unfolded.
